### **Multi-International Conference** Theme, Scopes, and Interests

BPUT Multi International Conference on Emerging Trends in Evolving Technology (BMIC-ETET 2025) focuses on harnessing the power of advanced computing technologies and intelligent systems to drive sustainable development. By integrating artificial intelligence, machine learning (ML), and data analytics, this interdisciplinary field aims to create innovative solutions that address environmental challenges, optimize resource usage, and promote green technologies. The goal is to develop intelligent systems that not only enhance efficiency and productivity but also contribute to the creation of sustainable urban environments, smart energy management, and resilient ecosystems, ultimately supporting the transition towards a more sustainable and equitable society. Purpose: The BPUT Multi International Conference (BMIC-ETET 2025) on Emerging Trends in Evolving Technology conference aims to bring together experts, researchers, practitioners, and policymakers from various fields to explore and discuss the integration of computing technologies and intelligent systems in promoting sustainability. The conference serves as a platform to share innovative ideas, present research findings, and foster collaborations that contribute to sustainable development

The scope of this conference is focused and includes Intelligent Information and Computing Systems; Smart Materials, Composites, and Structures; Society, Informatics, and Sustainability; Physical, Environmental, and Computational Sciences and the topics for the proposed conference include, but are not limited to the following:

> Best Paper Award (Track Wise) Accepted and presented papers will be submitted to Conference **Proceedings of CRC Press, Taylor and** Francis Group for SCOPUS Indexing
